

# RICARDO PEREIRA

Computer Engineer

## SUMMARY

I recently finished my degree in Computer Engineering. Although I have not yet acquired professional experience, I have a great willingness to learn and the ability to adapt quickly to new technologies and work effectively in a team environment.

## EXPERIENCE

Collaborator of the Pedagogical Department

Núcleo de Estudantes de Engenharia Informatica

JUN. 2021 - JUL.2023

## PROJECTS

UTAD Summit - Organization

OCT. 2022 - MAR. 2023

@utadsummit

I acted as one of the organizers of the event, which involved the participation of over 10 companies, with the purpose of promoting networking and improving the pedagogical skills of the students.

Webfolio

React

I developed this project in React to deepen my knowledge of the technology while showcasing my skills in web design and development.

Flutter GPT

Flutter | OpenAI API

A mobile application that uses the OpenAi API to generate text-to-text and text-to-image content.

Developed as the final project of a course unit.

KeyCord

C# | .Net | SQL

A web application for purchasing game keys, with a visual design inspired by Discord.

Developed as the final project of a course unit.
